Makit Products has been in the business of taking images and creating customized melamine plates, bowls, tumblers, mugs, platters and snack trays for more than 40 years. We print high-resolution images on special thermal-treated paper. This paper is then incorporated into a hot compression mold. The image becomes part of the melamine product. The end result is a dinnerware product that is unique and completely food safe. Our products are dishwasher-safe and can be used every day. Since they're made of melamine, they are very durable and break resistant.
